DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract should be amended to clearly describe the claimed invention.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 09/004,271

Art Unit: 2861

Claims 16 and 22, each storage chamber can only store ink of one color.

Claim 19, the "direction for ink supply ports" is not defined.

The remaining claims are also rejected under 35 U.S.C. 112, second paragraph, for being dependent upon a rejected base claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-18, 20, and 24-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshimura (US 4,630,076).

Yoshimura discloses all the claimed features of the invention including:

- an ink cartridge (6) which is used for an ink-jet recording apparatus, comprising:
- a plurality of ink storage chambers (tanks of 6) storing cyan ink (C, Fig. 4), magenta ink (M, Fig. 4), and yellow ink (Y, Fig. 4); and
- wherein the ink storage chambers are accommodated integrally in the ink cartridge (Fig. 4);

Page 4

Application/Control Number: 09/004,271

Art Unit: 2861

- each ink storage chamber has an ink supply port (6Y, 6M, 6C, 6B, 6W), and all ink supply ports are aligned on one straight line (Fig. 4);

- the yellow ink is stored in the ink storage chamber located at the most end side of the ink storage chambers (Fig. 4);
- the inks are stored in such a manner that similar colors are adjacent to each other (Fig. 4).

Even though Yoshimura does not disclose that the ink storage chambers are for storing light cyan ink, deep cyan ink, light magenta ink, and deep magenta ink, it has been held that claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. In re Danley, 120 USPQ 528, 531 (CCPA 1959).

"Apparatus claims cover what a device is, not what a device does."(emphasis in original) Hewlett - Packard Co. v. Bausch & Lomb Inc., 15 USPQ2d 1525, 1528 (Fed. Cir. 1990).

Allowable Subject Matter

4. Claims 19 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Page 5

Application/Control Number: 09/004,271

Art Unit: 2861

5. Claims 22 and 23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Reasons For Allowance

The combination as claimed wherein the partitioning walls are formed so that a thickness of the partitioning walls increases along the direction for ink supply ports of each ink storage chambers (claim 19) or the ink storage chambers are arranged in an order of storing the light cyan ink, deep cyan ink, light magenta ink, deep magenta ink and yellow ink in a horizontal direction (claim 21) or ink supply ports engaging with a plurality of ink supply needles for supplying the ink to the recording head, adjacent ones of said ink supply needles being arranged to have a height difference (claim 22) is not disclosed, suggested, or made obvious by the prior art of record.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Inoue et al. (US 5,619,237) discloses an integral color ink cartridge (Fig. 20).

Application/Control Number: 09/004,271
